

We can name Parts of a *Plant*

How to Use "Parts of a Plant" Mini Poster

Display the poster. Tell students that the poster shows several parts of a strawberry plant. Point out each labeled part and name it. Explain the main functions of the plant parts:

- A *fruit* gives seeds a covering.
- A *leaf* captures light to make food for the plant.
- A *stem* supports a plant and takes water from the roots to other parts of the plant.
- The *roots* take in water.

Refer to the poster periodically throughout your Tower Garden® growing process. Encourage students to use the correct plant part names as they describe their observations.
